Intermarine

Providing the most reliable liner services in the Americas for 30 years

Intermarine has been providing the most reliable liner services in the Americas for 30 years. Our team has the industry knowledge and technical expertise to provide the best solutions for our customers' unique and changing transportation requirements.

Intermarine's incomparable strength in the Americas is a result of three decades dedicated to building an extensive network of offices and long-term agents throughout South America and the Caribbean.

Through our unmatched staff and our active fleet management, Intermarine has the assets to provide long-term solutions for customers' supply chain needs. When necessary, we can provide services past the hook, including: intermodal logistics, documentation and customer coordination.

Superior Service on all Routes

Intermarine is dedicated to delivering superior service to and from North America, Central America, The Caribbean and South America.

Caribbean

The frequency and flexibility of our breakbulk service between the U.S. Gulf, NCSA, and the Caribbean ensures that customers will benefit from the fastest regional transit available. Weekly sailings offered to/from/between: Colombia, Venezuela, Trinidad, Guyana, Mexico, the Caribbean and Central America. Bi-weekly voyages to Suriname.

East Coast South America (ECSA)

From the Amazon River to the tip of Argentina, our ECSA service provides comprehensive coverage of every strategic point along the eastern coast of South America. For 30 years countless companies have relied upon our broad reach within this critical region.

West Coast South America (WCSA)

Intermarine's voyages are structured to provide frequent and reliable service for project, heavylift, containerized and grain/bulk cargoes. This services are offered from the U.S. Gulf to Ecuador, Peru and North Chile, with inducement port calls into Central America, Panama, Colombia and Central/South Chile.

PRESS INFORMATION

Creative Technical Solutions

Intermarine delivers operational excellence, technical expertise, equipment availability and cargo delivery in time and security sensitive environments.

Our in-house Technical Services department is staffed with Port Captains and Marine Engineers. In addition the team of Intermarine is backed up by the experts at SAL Engineering, an independent engineering and consultancy house and sister company to SAL Heavy Lift. Their combined technical expertise delivers creative solutions to assist clients with stowage, lifting, securing and loadspreading arrangements for all cargo types.

Customized Method Statements

Our method statement is comprised of a step-by-step loading/discharging procedure, stowage plan, and lifting & securing plans with supporting calculations. This procedure ensures that your cargo is loaded safely and efficiently. Additionally, Intermarine's QHSE programs provide the assurance that your cargo will be moved according to plan and with minimized risk.

Port Captain Services

Our highly experienced Port Captains evaluate and execute the stowage and handling of cargos worldwide and offer 24-hour supervision of all cargo operations. Once loading is complete, a full Port Captain Report is drafted to include a final stowage plan, photographs of the loading operations and detailed discharge instructions. The reports aid in reducing risk of damage to cargos and vessel's time in port.

Drawing Software and 3D Modeling

Intermarine uses state-of-the-art software for optimal cargo planning. We offer in-house Finite Element Analysis, AutoCAD and 3D Modeling when managing the most complex and challenging cargo for our customers.

QHSE

Being an integral part of our everyday business, QHSE Management is deeply embedded in the mindset and philosophy of Intermarine.

The health and safety of our employees ashore and crews on board, protection of the environment and striving for quality excellence drives the sustainability of our success and long-term reputation.

In addition to complying with International and local rules and regulations, Intermarine defines and follows internal standards to meet and exceed our clients' expectations, prevent incidents at the workplace and minimize our impact on the environment.

About SAL Heavy Lift

SAL Heavy Lift, a member of the Harren & Partner Group, is one of the world's leading carriers specialized in sea transport of heavy lift and project cargo. The modern fleet of heavy lift vessels offers highly flexible options to customers both within project shipping as well as in offshore projects. With travel speeds of up to 20 knots, up to 3500 square metres of unobstructed main deck space and combined crane capacities ranging from 550 to 2000 tonnes the fleet belongs to the most advanced in the heavy lift sector.

With the Type 183 fleet, equipped with dynamic position systems and an optional mountable Fly-Jib for greater crane outreach, SAL offers offshore services to multiple sectors. With the Type 171 and 116, SAL holds a fleet of heavy lift vessels with 1A ice class, capable of trading in arctic waters and northern sea route transits.

As a leading global company in the heavy lift and project cargo segment, SAL meets the highest standards with regard to quality, technical innovation, health, safety and environment. SAL's latest investments in advanced hydrogen/methanol power generators, takes an industry leading step in applying green technology to its fleet. The global outreach of SAL is ensured via own sales offices and exclusive agents spread across more than 20 countries.
